Air Products: Your Trusted Helium Partner for MRI Operations

MRI Offerings

- **Supply confidence:** Reliable helium supply from a recognized leading global supplier offering customers the supply security and reliability they require.
- **Efficient fills:** Thousands of fills performed globally using specialized equipment and trained technicians
- **Cold-side support:** A full-time global team of highly skilled technicians with experience supporting MRI equipment.
- **Coordination:** Support from planning and scheduling through fill execution and reporting.

Air Products is a leading global helium supplier, providing the supply reliability and security MRI facilities depend on to keep critical imaging systems operating efficiently.

Our MRI expertise sets us apart. Supported by a global network of highly skilled technicians and longstanding relationships with leading MRI equipment manufacturers, we perform thousands of helium fills each year to help maximize scanner uptime and operational performance.

From helium supply and fill planning to expert cold-side support and service reporting, Air Products delivers a seamless experience through centralized coordination and dependable execution. We help MRI imaging centers maintain reliable operations so they can focus on patient care.

Service Level Options to Fit Your Operation

Supply product only

Liquid helium delivered in dewars to the imaging center.

Best fit when your organization manages transfer and on-site execution.

Product + technician assistance

Liquid helium plus an Air Products trained technician who assists your technician during the fill process.

Best fit when you are troubleshooting abnormal situations such as a quench recovery.

Product + complete cold-side service package

Liquid helium plus an Air Products trained technician to perform the ˚KeepCOLD® fill service.

Best fit when you want a turnkey cold-side service package.

Coordinated Cold-Side Service at a Glance

1 **Schedule**
Coordinate with site personnel and plan delivery.

2 **Arrive**
Bring liquid helium and required transfer equipment.

3 **Fill**
Perform the magnet fill during agreed off-hours.

4 **Clear**
Remove dewars and equipment after completion.

Specialized Delivery and Transfer Equipment

Dewar containers filled at transfills, custom trucks with lift gates, and specialized non-magnetic equipment support controlled delivery and transfer from the transfill to the magnet. After-hours service helps reduce operational disruption and preserve imaging availability.
