

Air Products

Your reliable helium partner
and a global leader

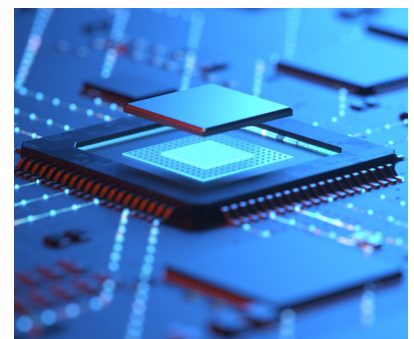

Helium is essential for many industries, but it's a finite resource with rising global demand. Air Products stands out as a trusted partner, offering unmatched expertise, supply reliability, and innovative solutions honed over decades. We pioneered many of the technologies used in helium extraction and distribution today, and our global network ensures you get the helium you need—wherever you operate.

Supporting your success across applications

Air Products helium powers innovation and reliability in:

- **Magnetic Resonance Imaging:** Trusted by leading hospitals and MRI manufacturers for critical cooling and superconductivity. We pioneered the full-service approach, providing both cryogen supply and fill services with our KeepCOLD® Services program using our highly trained technicians.
- **Semiconductors/Fiber Optics Manufacturing:** Enables advanced manufacturing with stable, inert atmospheres and enhanced heat transfer.
- **Pressurizing/Purging:** Defense, nuclear and aerospace industries use helium for leak detection in critical equipment and for purging and propellant transfer. Our proprietary liquid helium pumps—available exclusively from Air Products—enable these industries to pressurize large on-site gaseous storage vessels at lower costs, with less energy and at faster rates.
- **Scientific:** Industrial, university, and government labs use helium to ensure low-temperature refrigeration for energy, physics and superconductor development. Near-absolute zero environment that only helium can provide is used with nuclear magnetic resonance imaging.

- **Lifting:** Fuels everything from high-altitude scientific research balloons to advertising blimps.
- **Leak Detection:** Use of mass spectrometers and helium can detect small holes or tears in equipment, preventing manufacturing defects.
- **Breathing Atmospheres:** Diving industry relies on helium for the pursuit of new, offshore energy sources, exploration and mapping operations.
- **Metallurgy/Welding:** Delivers cleaner, faster welds and supports production of high-performance metals.
- **Emerging Technologies:** We collaborate with customers to develop new helium applications for tomorrow's needs.

What sets us apart?

- **Unmatched Reliability:** Air Products has a diversified helium supply network with multiple sources and backup systems including a storage cavern located in Texas to ensure continuous delivery.
- **Global Reach:** Our extensive infrastructure and distribution capabilities mean we can support your operations worldwide, with local service and rapid response.
- **Industry-Leading Safety and Service:** Our commitment to safety and quality is recognized across the industry. Our expert teams provide technical support and responsive service 24/7/365.

Partner with confidence

When you choose Air Products, you're partnering with a company that:

- Invests in the latest technology and operational excellence
- Delivers secure and reliable supply
- Provides exceptional customer service and technical support
- Is dedicated to supporting your growth and achievement

Ready to learn more?

Let Air Products put our resources and expertise to work for you. Contact us today to discuss your helium needs and discover how we can help your business thrive.
